Designer Tools for PyQt5

NOTE: The method explained in the video is obsolete, as the wheel files are no longer available on the website.

Kindly follow these steps to install QT Designer on your computer.

For Windows:

1. Open command line window.

2. Run the command: **pip3 install pyqt5-tools==5.9.0.1.2**

3. Go to your Python installation folder (assuming it is C:\python36)

4. You will find a folder called **Lib.** You will find designer.exe file in it's sub-directories.

5. Go to the folder **C:\Python36\Lib\site-packages\pyqt5-tools**

6. You can find **designer.exe** in this folder. Run that file

For Linux:

1. Open terminal.

2. Run the following command: **sudo apt-get install qttools5-dev-tools**

3. The executable file **designer** can be found in the following directory: **/usr/lib/i386-linux-gnu/qt5/bin/**

NOTE: The directory name **i386-linux-gnu** may differ on your machine, depending on your OS variant.

MyUI Files

[Download](#) the .ui and .py files used in the video.
